

Adapter cable CAPDIS

Coaxial cable to capacitive sensor

The AK4 serves as an adapter between a coaxial cable set and a capacitive sensor with M6 screw connection (e.g. KKE). The AK4 enables simple plug-in mounting of the coaxial cable set. For a set of coaxial cables 3 pieces AK4 are needed. An additional coaxial cable set is required for connection to CAPDIS.

Technical Data

General data

Article number	2037611
Product designation	Adapter cable AK4; 160 mm; M6
Usable with	CAPDIS-Sx, VOIS

Dimensions and type of installation

Total length L	160 mm
----------------	--------

Operating conditions

Operating temperature	-25°C ... 55°C
Storage temperature	-30°C ... 75°C
Protection class	IP54
Rated frequency	50 Hz, 60 Hz
