Universal adapter cable set

For universal tester CAP-Phase

The adapter cable set is used for contacting mechanically non-standard interfaces which, for example, do not comply with the standard spacing of the sockets or on which there is no socket for the insulating sleeve. Electrically, however, the interface must obey the HR or LRM conditions. For HR interfaces, an HR/LRM adapter must also be used.

Technical Data

General data

Article number	2500063
Product designation	Universal adapter cable set for CAP-Phase

Dimensions and type of installation

Total length L	10 cm

Operating conditions

Operating temperature	-25°C ... 55°C
Storage temperature	-30°C ... 70°C
Rated frequency	50 Hz, 60 Hz
Type of interface	LRM, HR
