

Universal tester for voltage testing, phase comparison and rotating field indication at capacitive HR and LRM interfaces according to IEC 61243-5 or IEC 62271-213.

### Properties

#### No battery required

Batteryless microprocessor technology

#### Turning field direction indicator

Determination of the rotary field

#### Maintenance test

at capacitive HR - and LRM interfaces

#### Integrated self-test

of device and test leads

.

#### Scope of delivery

Included in the scope of delivery is a universal tester.

### Variants

Item number	Description
2500066_H003	CAP-Phase Universal Tester   60 Hz   Complete Set
2500340	CAP-Phase Universal Tester   Single Unit
2500623	CAP-Phase Universal Tester   Complete Set

### Technical data

#### Device data

Article number	2500340
Product designation	CAP-Phase Universal Tester   Single Unit

#### Functions

Voltage test	✓
Maintenance test	✓
Phase comparison	✓
Rotary field measurement	✓

#### Dimensions

Case height x width x depth	80 x 170 x 35 mm
-----------------------------	------------------

#### Operating conditions

Operating temperature	-25°C ... 55°C
Storage temperature	-30°C ... 70°C
Protection class	IP54
Rated frequency	50 Hz

#### Power supply

Battery	No battery required
---------	---------------------
