

Connection cable voltage

For devices of the IKI series and ohmic sensors

This connection cable can be used to connect devices of the IKI-50 series to sensors (For the connection to the ohmic sensor, a coaxial cable set is additionally required).

Features

The cable is used to connect a capacitive sensor directly to the voltage input U1 of the IKI-23 with LRM-Module. Cable set including double blade socket adapter. An additional coaxial cable set may be required for the connection to the sensor.

Technical Data

General data

Article number	2500486_H004
Quantity unit	Piece
Product designation	Y-cable IKI-23 U1 to capacitive tap 0,4 m

Dimensions and type of installation

Total length L	0 m
----------------	-----

Operating conditions

Operating temperature	-25°C ... 55°C
Storage temperature	-30°C ... 75°C
