

# Wall-mounted housing for CAPDIS and IKI devices

This wall-mounted housing allows easy installation of two CAPDIS devices and / or IKI devices. When retrofitting distribution network stations, intelligent components can be easily and clearly installed with this wall-mounted housing.

## Application areas

Usually, wall-mounted enclosures are installed in direct relation to the respective feeder (e.g. on the opposite side).

- **Voltage Detecting Systems:** CAPDIS-S1x, CAPDIS-S2x
- **Fault indicators:** IKI-20, IKI-22, IKI-23
- **Protection Relays for transformers:** IKI-3x
- **Feeder Control Units:** IKI-50, IKI-55

## Technical Data

### General data

Article number	2501824
Quantity unit	Piece
Product designation	Wall housing 180 x 110 x 137 mm - 2 devices plugged into front cutout
Usable with	CAPDIS-Sx, IKI-20, IKI-22, IKI-23, IKI-30, IKI-35, IKI-50, IKI-50_1F R2, IKI-50_1F R2e

### Dimensions and type of installation

Wall housing - installation type	2 devices plugged into front cutout
Housing material	Plastic
