

Universal tester for voltage testing, phase comparison and rotating field indication at capacitive HR and LRM interfaces according to IEC 61243-5 or IEC 62271-213.

### Properties

#### **No battery required**

Batteryless microprocessor technology

#### **Turning field direction indicator**

Determination of the rotary field

#### **Maintenance test**

at capacitive HR - and LRM interfaces

#### **Integrated self-test**

of device and test leads

.

#### **Scope of delivery**

The standard scope of delivery includes one universal tester, two test leads 2 m each, two HR/LRM adapters and a carrying case.

### Variants

Item number	Description
2500066_H003	CAP-Phase Universal Tester   60 Hz   Complete Set
2500340	CAP-Phase Universal Tester   Single Unit
2500623	CAP-Phase Universal Tester   Complete Set

### Technical data

#### Device data

Article number	CAP-Phase
Product designation	CAP-Phase Universal Tester

#### Functions

Voltage test	✓
Maintenance test	✓
Phase comparison	✓
Rotary field measurement	✓

#### Dimensions

Case height x width x depth	340 x 275 x 83 mm
-----------------------------	-------------------

#### Operating conditions

Operating temperature	-25°C ... 55°C
Storage temperature	-30°C ... 70°C
Protection class	IP54
Rated frequency	50 Hz
Battery	No battery required

### Accessories

Article number	Product designation
3501101	Shoulder bag for CAP-Phase
2500063	Universal adapter cable set for CAP-Phase
